

Study Island, a research-based standards mastery program designed to help prepare students for the Illinois Standards Achievement Test (ISAT), is again available for Sutherland students.

Using Study Island from Home

Study Island is completely Web-based which allows students to access the program from any computer with an Internet connection and a standard Web browser. Study section results are automatically recorded for teacher review, including results from sessions completed outside of school.

Sutherland students will have access to the following subjects:

Grades 3, 5, 6, and 8 – Math and Reading

Grades 4 and 7 – Math, Reading, and Science

The program is divided into sections based on subject. Each subject is made up of 15-30 topics, with each topic containing about 20-30 questions. Topics are accompanied by a lesson, which contains a brief overview of the material covered in that topic.

Follow the instructions below to use the program:

1. Go to <http://www.studyisland.com>.
2. Enter your username and password at the upper left side of the screen and click "Submit."

Username: FirstnameLastname@sutherland (Example, FredSmith@sutherland)
Use the student name as printed on the report card.

Password: student (You will be prompted to change this password on your first login.) Passwords do not change from year to year so last year's password will work for the current school year.

3. Click on a subject (math, reading, or science).
4. If this is the first time using the program, click "Pretest." **You must complete 10 Pretest questions to unlock the rest of the content in that subject.** If you have already taken the Pretest, you may move on to the other content topics.
5. Choose a Session Type. The default setting is Test mode, however students may also select Printable Worksheet or Game mode.
6. To pass a topic, you must meet the passing requirements, which are based on a minimum number of questions answered (usually 10) and a minimum percentage correct (around 70%). A blue ribbon icon is displayed next to all passed topics.
7. Once you have completed the Pretest, you may work through the remainder of the topics in any order. You must pass all topics before taking the Post Test.
